

Global Switch to Equinix Dark Fibre Service

Luminet has extended its Dark Fibre network in the Sydney metropolitan area by directly linking Global Switch's Data Centre in Ultimo (45,000m²) with the two Equinix Data Centres located at Alexandria (18,000m²) and Mascot (12,300m²).

High Performance

The Equinix and Global Switch sites are over five kilometres apart but are now directly connected with a hard spliced optical fibre network backbone from Luminet which offers point-to-point Dark Fibre services. The link essentially provides a very long fibre cross-connect between the two sites and hence allows customers to build a high performance private network that gives them total control.

Low Cost

Luminet's infrastructure, resources and processes are optimised for the supply and support of Dark Fibre. Combining this fact with the economics of Luminet's high density Dark Fibre network means that we can pass on these efficiencies and offer highly competitive pricing to our customers. The result is a very cost-effective solution, especially when compared to slower, less reliable and less secure services such as Metro Ethernet.

Dark Fibre Benefits

Cost-Effective

Fixed pricing for unrestricted capacity gives you a cost-effective link for high bandwidth requirements.

Future Proof

You control what transmission technology and protocols to use over your dedicated link.

Reliable

Premium Service Levels are offered with every link and backed by a full 24x7 support service.

Secure

Your allocated Dark Fibre cores are completely dedicated to you from end-to-end giving you unprecedented protection from intrusion.

Luminet is a fully licensed telecommunications carrier that focuses purely on providing high performance Dark Fibre network links.

Luminet combines an experienced team, the latest optical fibre technologies, and a full portfolio of support services to provide you with complete end-to-end Dark Fibre solutions.

Luminet owns and maintains its own Dark Fibre network which means you can be assured of receiving rapid, effective and qualified support at all times from a team of Dark Fibre professionals.

Luminet. Dark Fibre. Pure Focus. Complete Solutions.
