

# Dark Fibre Network Specialists

Luminet is a leading pure-play Dark Fibre provider

**Luminet is an Australian licensed telecommunications carrier that specialises purely in the provision of Dark Fibre services.**

*The demand for high capacity network connections continues to grow and Dark Fibre remains the most reliable, flexible and cost efficient physical transmission medium available today to deliver the performance needed to meet this growing demand.*

## Pure Dark Fibre Focus

Luminet's total focus on Dark Fibre means that we can assist you with every aspect of your requirements to deliver a solution that gives you maximum Performance, Security and Reliability.

Maximum Performance is delivered through the unrestricted bandwidth capacity capabilities of Dark Fibre.

Maximum Security is achieved through point-to-point links that are completely dedicated to you with no active third party network elements between your end locations.

Maximum Reliability is accomplished through a passive end-to-end hard spliced fibre connection that is supported by our 24x7 support team.

## Low Cost

Luminet's infrastructure, resources and processes are optimised for the supply and support of Dark Fibre. As a result we can pass on these efficiencies to our customers by offering highly competitive pricing, especially when compared to slower, less reliable and less secure services such as Metro Ethernet.

## Complete Solutions

Luminet can provide you with Dark Fibre links from our existing network or we can custom build a solution to meet your unique requirements.

Our experienced professionals can help you through every stage of your Dark Fibre deployment including Design, Deployment and Support.

**Luminet. Dark Fibre. Pure Focus. Complete Solutions.**
