

Why Luminet?

Selecting a Communications Service Provider is an important decision for any business, so we have listed the key reasons why Luminet should be your preferred Dark Fibre supplier and encourage you to compare us against the competition.

Pure Focus

Luminet focuses specifically on providing Dark Fibre solutions. This means that you can be sure you are dealing with experienced professionals who understand every aspect of your deployment.

Low Cost

Luminet's infrastructure, resources and processes are optimised for the supply and support of Dark Fibre. Combining this fact with the economics of Luminet's high density Dark Fibre network means that we can pass on these efficiencies and offer highly competitive pricing. The result is a very cost-effective solution, especially when compared to slower, less reliable and less secure services such as Metro Ethernet.

Complete Solutions

Luminet will provide you with a single point of contact to handle every aspect of your Dark Fibre implementation. We realise that the deployment of a Dark Fibre service can be complex and hence we offer a complete range of services including design, deployment and support.

Service Reliability

Luminet owns and maintains its own Dark Fibre network which means you can be assured of receiving rapid, effective and qualified support at all times from a team of Dark Fibre professionals. Every service is backed with 24x7 support, carrier grade service levels and service rebates.

Luminet is a fully licensed Australian telecommunications carrier and the stand-out choice as a professional supplier who will assist you with every aspect of your Dark Fibre service.

Put us to the test and contact us for a friendly discussion on how we can help you deploy a rapid, reliable, secure and cost-effective Dark Fibre service.

Luminet. Dark Fibre. Pure Focus. Complete Solutions.
